Australian Financial Services and Credit Licence No: 238256

Goals and Objectives

We want to help you achieve your lifestyle and financial goals. To do so, we need a general understanding of your situation and how you think we could help you.

Why are you seeking our advice?

.....

.....

.....

.....

.....

.....

What are your goals and objectives for the future? Where possible please include an amount and time frame. Please also include any planned expenditure e.g. new car, renovations, or holiday. (Use client's own words)

Goal	Amount	Time Frame and Importance
		Short/ Medium/Long Term

Note: Any adviser identified goals can be noted later in the Fact Find.

If low-means, what is the facility's Accommodation Supplement amount?		

Investment Profile

This profile is in 3 parts:

Part 1: Investment Fundamentals

Part 2: Questions regarding your tolerance to risk

Part 3: Choosing your Investment Profile

We encourage you to ask as many questions as you need to feel comfortable with that choice.

Part 1: Investment Fundamentals

Investing can invoke strong emotions in all of us. Even the most seasoned investors worry about market volatility, time in the market and the impact decisions can have on long term plans. It is important for us to understand your attitude to investing and different investments.

What is an Investment Profile?

- An Investment Profile is a way of finding out a person's willingness or reluctance to take on risks.
- There are six Investment Profiles to choose from, each with their own risk and return characteristics.
- Each Investment Profile is linked to investment asset class allocations.
- These Investment Profiles are designed with reference to Morningstar Research¹, which provides historical and forecast data on risk, returns and asset classes.

How does my Adviser use an Investment Profile in their recommendations?

Once your Investment Profile is agreed, your Financial Adviser will recommend specific investments which reflect the asset allocation and risk characteristics of your Investment Profile.

Focusing on Asset Allocation

Asset allocation is a way of investing in a mix of investment types or classes such as Cash, Fixed Interest, Shares, Listed Property and Alternatives/Infrastructure. Since Australia makes up less than 2%² of the world economy, asset classes can be further broken down into International and Australian.

Defence Assets		Growth Assets	
Cash Fixed Interest		Shares Managed Funds Listed Property Alternatives/ Infrastructure	
Income in the form of interest but no growth of the initial investment amount		Capital growth of the initial investment and generally some income	
Advantages	Disadvantages	Advantages	Disadvantages
Value does not generally fall Less volatile	Inflation may erode real value	Growth means investment has a better chance to keep pace with inflation	Volatile - investment value goes up and down
Income is generally fixed or known for a certain time frame	Generally lower rate of return than growth investments	Generally higher rate of return than defensive assets	Income is not guaranteed or fixed
Easy access to funds	Returns are generally fully taxable at the marginal rate	Returns usually more tax efficient	Returns are not guaranteed and can be positive or negative
Security of capital	Little opportunity to find better rates as providers tend to match rates	More chance for diversity across different industries and countries	In some cases the initial value of the investment can be lost e.g. purchasing shares in a company which fails

¹ Morningstar is one of Australia's well known research and investment companies.

² https://en.wikipedia.org/wiki/Economy_of_Australia 5/6/2016

Risk and Return trade off

Investment decisions involve taking risks. In planning to meet your goals, objectives and future needs, you need to consider what level of risk you are willing to take or tolerate to achieve your aims.

What is risk and return?

Return is the reward received for investing. It can be income such as dividends or an increase in value or growth of investments. Risk is the possibility of losing money, real or unrealised. The graph below demonstrates the higher the risk, the higher the potential return.

There are 3 main risks you need to consider:

1. Inflation: Where inflation or the cost of your lifestyle expenses exceeds the return of your investments. The table below illustrates that a low risk investment like 'cash' with a fluctuating interest rate can be eaten away at by inflation at times. This effectively reduces the purchasing power and ability to fund lifestyle and expenses based on savings alone.

Source: Morningstar data Cash rate to 30 September 2020. Inflation rate at June 2020. Past Performance is not an indicator of future performance.

2. Investment: Where the performance or return of your investments does not meet the income and/or growth expected and potentially you end up with less than when you started (loss of capital). Specific investments may have other risks.

3. Volatility: Is the ability to ride out fluctuations in value and performance of investments.

Diversify to reduce risk

Diversification is investing into a mix of different asset classes and even underlying funds, fund styles, companies, industries and economies around the world.

The table below shows asset classes in order of best to worst performance since 1990. Green is the best performing year for the asset and red is the worst. History shows you can't predict with certainty the best performing investment year to year, so don't try.

Year	Cash	Australian Bonds	Australian Shares	International Shares	Listed Property	US Shares
1990	16.25	19.10	-17.52	-15.09	8.70	0.37
1991	11.20	24.75	34.24	19.96	20.08	33.66
1992	6.92	10.41	-2.31	4.60	3.49	18.57
1993	5.39	16.32	45.36	24.20	29.97	11.74

Time in the Market, not timing the Market

The length of time you wish to invest – your investment time horizon - is critical to improving the probability of meeting your investment goals. You need to consider when you may need to cash in your investment or start to draw an income.

The chart below shows the performance of various asset classes over the last 30 years. As you can see, all asset classes increase over the long term. The chart also illustrates the benefit of diversifying investments across asset classes to help reduce volatility and smooth out returns over time. Blending asset classes over longer time horizons helps reduce risk.

Source: Morningstar data 30 September 2020 (Vertical is growth of index %). Past Performance is not an indicator of future performance.

Volatility

Market volatility refers to the movement of the value of investments in the market. Sometimes the values can move rapidly and this movement can be stressful for investors when they see these values rise and fall quickly. Although market volatility is out of your hands, it can impact on your personal financial situation. There are two types of volatility:

- Value Volatility - the value of growth investments fluctuates. This in the short term can be a concern but long term asset values eventually rise as can be seen from the chart. What is important is investing in the right asset class for the length of time you intend to invest to minimise the chance you need to sell down an investment at a low point.
- Return Volatility - changes in the return or income received from investments. This is extremely important where you are relying on the income from investments to fund your lifestyle like in retirement.

Part 2 Questions regarding your tolerance to risk

Answers range from 1 to 6. Generally, 1 corresponds with the most conservative 100% defensive assets investment profile and range up to 6 which corresponds to the most aggressive 100% growth investment profile.

Please answer the following required questions		Please tick ✓			
Question 1	Response	Client 1	Client 2	Joint	
Experience in investing	How familiar are you with investing?				
	Not at all	1			
	Not very familiar	2			
	Have experience with superannuation and debts	3			
	Experienced as an investor inside and outside superannuation	4			
	Experienced as an investor in a wide range of investment types such as shares, managed funds, property	5			
	Experienced as an investor in a wide range of investment types and debt structuring	6			
Question 2	Response	Client 1	Client 2	Joint	
Appetite to risk	What level of risk or periods of poor returns would you be prepared to accept with regards to your investments?				
	Very conservative, I will not take any risk of a fall in value of capital for any period of time	1			
	Fairly conservative, preferring not to have negative returns but with a view to consistent returns	2			
	Willing to take some risk of short term, negative performance to improve returns	3			
	Willing to take reasonable amount of risk of short term, negative performance to improve returns	4			
	Willing to take more risk of short term negative performance to improve long term returns	5			
	Willing to take maximum risk of short term negative performance to improve long term returns	6			
Question 3	Response	Client 1	Client 2	Joint	
Tolerance to risk	How long are you likely to continue with an investment strategy that is not meeting your expectations, for example the strategy has been generating a negative return or not producing sufficient income?				
	I would change it immediately	1			
	Up to 6 months	2			
	Up to 12 months after discussing concerns with my adviser	3			
	Up to 2 years after discussing concerns with my adviser	4			
	Up to 3 years after discussing concerns with my adviser	5			
	It would depend on the purpose of the investment and its place in my portfolio	6			

	Question 4	Response	Client 1	Client 2	Joint
Appetite to risk	How would you react if your investment fell by as much as 30% in value in a very short period of time i.e. a year or less?				
	You would immediately withdraw your funds. Security of your initial investment/capital is important and you did not intend to take such a large risk	1			
	You would cut your losses and transfer your funds into more secure investment sectors	2			
	You would be concerned, but would wait to see if the investments improve	3			
	This was a calculated risk and you would leave the investments in place, expecting performance to improve	4			
	You would see this as an opportunity and invest more funds, expecting future growth	5			
	You would see this as an opportunity and borrow to invest a lot more funds, expecting future growth	6			
	Question 5	Response	Client 1	Client 2	Joint
Risk Return trade off	Choose the most appropriate response to the following statement. Keeping my money safe is more important than the possibility of earning higher returns or having a more comfortable lifestyle in the future.				
	Strongly agree	1			
	Agree	2			
	Neither agree or disagree	3			
	Somewhat disagree	4			
	Disagree	5			
	Strongly disagree	6			
	Question 6	Response	Client 1	Client 2	Joint
Capital security	Choose the most appropriate response to the following statement. I am willing to experience the ups and downs of investment markets over the long term for the potential of greater returns.				
	Strongly disagree	1			
	Disagree	2			
	Neither agree or disagree	3			
	Somewhat agree	4			
	Agree	5			
	Strongly agree	6			

	Question 7	Response	Client 1	Client 2	Joint															
Sleep test	How do you feel if your investments go down in value?																			
	Extremely concerned; it becomes the thing I think about most. I wouldn't be able to sleep at night.	1																		
	Very concerned; it becomes something I think about a lot	2																		
	Concerned; it comes to mind when I see or hear the media	3																		
	Not overly concerned, I'd ask my adviser if I needed to do anything	4																		
	Not very concerned; it crosses my mind on occasion	5																		
	Indifferent, I like to get on with other things	6																		
	Question 8	Response	Client 1	Client 2	Joint															
Time frame	For how long would you expect your money to be invested before you would need to spend it? (Assuming your adviser has made plans to meet short-term needs and to handle emergencies)																			
	Less than 2 years	1																		
	Between 2 and 3 years	2																		
	Between 3 and 5 years	3																		
	More than 7 years	4																		
	More than 9 years	5																		
	10 years or more	6																		
	Question 9	Response	Client 1	Client 2	Joint															
Portfolio	The table below shows the highest one-year gain and highest one year loss on four different hypothetical investments of \$100,000. Given the potential gain or loss in any one year where would you invest your money? (Refer to the Investment Profile page for more information on expected returns).																			
	<table border="1"> <thead> <tr> <th>Investment Portfolio</th> <th>A</th> <th>B</th> <th>C</th> <th>D</th> </tr> </thead> <tbody> <tr> <td>Highest indicative gain in any one year</td> <td>\$15,000</td> <td>\$20,500</td> <td>\$26,600</td> <td>\$31,300</td> </tr> <tr> <td>Highest indicative loss in any one year</td> <td>-\$2,400</td> <td>-\$6,400</td> <td>-\$11,000</td> <td>-\$14,600</td> </tr> </tbody> </table>					Investment Portfolio	A	B	C	D	Highest indicative gain in any one year	\$15,000	\$20,500	\$26,600	\$31,300	Highest indicative loss in any one year	-\$2,400	-\$6,400	-\$11,000	-\$14,600
	Investment Portfolio	A	B	C	D															
	Highest indicative gain in any one year	\$15,000	\$20,500	\$26,600	\$31,300															
	Highest indicative loss in any one year	-\$2,400	-\$6,400	-\$11,000	-\$14,600															
	None of these portfolios	1																		
	Investment Portfolio A	2																		
Investment Portfolio B	3																			
Investment Portfolio C	4																			
Investment Portfolio D	5																			

Sometimes investing according to your desired level of risk means you will not be able to afford your current or future lifestyle goals.

Are you willing to take on more risk to potentially meet your current and future lifestyle goals? What sorts of risks are you willing to take? What are the limitations?

Part 3 Choosing your preferred Investment Profile

The following describes the six different Investment Profiles we use for investing. You are able to choose between

- A) One of these Investment Profiles
- B) Your own blend of asset allocation.

A) Choose an Investment Profile

15% Growth - 85% Defensive Assets - This portfolio suits investors who give a high priority to the preservation of capital and are therefore willing to accept lower potential investment performance, hence the 85 percent exposure to income assets (cash and fixed interest). This suits investors with a minimum two-year timeframe or those that seek a portfolio comprising mainly of interest bearing assets.

30% Growth - 70% Defensive - This portfolio suits investors seeking a low level of investment value volatility, and therefore willing to accept lower potential investment performance, hence the 70 percent exposure to income assets (cash and fixed interest). This suits investors with a minimum three-year timeframe or those who primarily seek income with some potential for capital growth.

50% Growth - 50% Defensive - This portfolio suits investors who desire a modest level of capital stability but are willing to accept moderate investment value volatility in return for commensurate potential investment performance, hence the 50 percent exposure to growth (shares and listed property) and 50 percent exposure to income (cash and fixed interest) assets. This suits investors with a minimum five-year timeframe or those who seek both income and capital growth.

70% Growth - 30% Defensive - Some capital stability is still desired, but the primary concern is a higher return, hence the 70 percent exposure to growth assets (shares and listed property). This suits investors with a minimum seven-year timeframe or those who are willing to accept higher levels of investment value volatility in return for higher potential investment performance.

85% Growth - 15% Defensive - The 85 percent exposure to growth assets (shares and listed property) means that capital stability is only a minor concern. This suits investors with a minimum nine-year timeframe or those who are willing to accept high levels of investment value volatility in return for high potential investment performance.

100% Growth Assets - The 100 percent exposure to growth assets (shares and listed property) means that capital stability is not a consideration. This suits investors with a minimum ten-year timeframe or those who are willing to accept very high levels of investment value volatility to maximise potential investment performance.

Investment Profile

Asset Class	15% Growth/ 85% Defensive	30% Growth/ 70% Defensive	50% Growth/ 50% Defensive	70% Growth/ 30% Defensive	85% Growth/ 15% Defensive	100% Growth Assets

My Investment Profile Choice

By signing this document, I/We declare that I/We understand the Investment Fundamentals section of this Fact Find and my/our Adviser has explained the characteristics of the different asset classes and their limitations; the risk-return trade off; the importance of time in investing and diversification, to my/our satisfaction. We believe the Investment Profile selected and its related investment asset allocation suits our risk tolerance and investment timeframe.

Yes, I/We have asked all the questions we needed to understand our Investment Profile choice.

Privacy Acknowledgment

As part of the process to provide you with appropriate financial planning advice, Matrix Planning Solutions and your Adviser and related entities (Matrix's , we, our or us) undertake a data gathering exercise relevant to the areas of advice you have sought. We may need to contact and disclose information about you to product providers, superannuation fund administrators and investment managers to fully understand your financial situation, investments and policies. This may include verifying your identity in accordance with the Anti-Money Laundering and Counter Terrorism requirements.

By signing this document, I/We acknowledge that in the course of providing you with Financial Services, Matrix or your Adviser may need to disclose Personal Information to service providers based overseas or organisations based in Australia that utilise some services themselves from overseas.

By signing this document, I/We acknowledge and understand my personal, sensitive and health information (if relevant) will be collected, used, stored, disclosed in accordance with Matrix's Privacy Policy and the Privacy Act 1988 (Cth).

Family and relatives consent

Your relevant personal circumstances may include information regarding your family in order to provide appropriate financial planning advice to you. Where this information is reasonably required from you, we expect and assume that you have their consent to provide this information to us.

By signing this document, I/We understand that relevant personal circumstances may include information about my family, such as my spouse and children. My relevant family members are aware I/We have sought financial planning advice and understand the purposes for which I/We have provided their personal information to my Adviser.

Incomplete or inaccurate information

By signing this document, I/We understand that if I/We have not provided all relevant financial information accurately when requested (or limited the scope of the advice), then there are limits on how appropriate a personal recommendation may be. In such cases, the recommendation provided may not be appropriate for your financial needs, circumstances and objectives.

Tax File Number (TFN)

We may request the use of your TFN for the purposes of investing in, or acquiring new investment, superannuation or insurance products on your behalf. We will retain your TFN to use when required, however you may at any time, request we permanently delete your TFN information. Importantly, supplying your TFN is voluntary, and it is not an offence if you choose not to provide it.

Further information

Further details on how we handle personal information is explained in our Privacy Policy, available at <https://www.matrixplan.com.au/Documents/Privacy-Policy> or by contacting us on 1300 663 334.

Financial Adviser Declaration

We have given the client(s) our FSG Version Number: _____ on _____ (date provided) by _____ (method of delivery) and have explained it to them.

We have discussed with the client(s) the importance of obtaining detailed personal financial information in order to provide recommendations that are appropriate to their needs and circumstances.

We have explained to the client(s) the relevance of determining their risk tolerance with regard to choosing their own Investment Profile. We have discussed with the client(s) their attitude to risk and their chosen Investment Profile for the purposes of investing.

We have discussed with the client(s) that where required information has not been provided, the advice and recommendations that we provide may not be appropriate for their needs.
